

Move Your Business Forward with Chrome Enterprise Upgrade

What is Chrome Enterprise Upgrade?

Chrome Enterprise Upgrade unlocks the built-in business capabilities of Chrome OS devices for IT to secure, orchestrate and power the cloud workforce.

Advanced Security

Chrome Enterprise Upgrade provides IT with advanced security controls. If an end user misplaces their Chromebook, IT can easily disable the device, protecting corporate data. Devices can also be set as ephemeral, removing user data from the device at the end of a session.

Flexible Access

Chrome OS devices with Chrome Enterprise Upgrade provide flexible access to corporate data, regardless of use case. Integrate with Active Directory and SAML SSO providers or enable shared device use cases with managed guest sessions or kiosk mode.

Simplified Orchestration

Simplify orchestration of your Chrome OS device fleet. IT gains access to device policies, fleet oversight capabilities, and managed updates, all from the, cloud-based Google Admin console or third party UEM solution.

24/7 IT admin support

Contact Google for Chrome OS troubleshooting assistance with 24/7 IT admin support.

We can centrally manage Chromebooks in all of our customer offices using Chrome Enterprise Upgrade. Everyone can be on the same version of our application at the same time—there's just a single button to deploy versions to test environments as well as production."

David Murray,
*Chief Technology Officer,

The MSRP of Chrome Enterprise Upgrade is \$50 USD per device a year. However, prices may vary by region and reseller. Please contact your reseller for specific pricing available to you in your area.

Chrome Enterprise Upgrade and the Google Admin console give us the control and visibility we didn't have with Windows laptops. With Chrome Enterprise Upgrade, we can set up a new Chromebook in just a few minutes, and disable devices that are lost or stolen.”

Seosamh McMahon, *Enterprise Architect*, Ervia

1. Use of this feature requires you to have an agreement for Active Directory. For more information, see <https://support.google.com/chrome/a/answer/7497916?hl=en>.

2. Use of this feature requires you to have an agreement with an UEM provider. For more information, see <https://support.google.com/chrome/a/answer/7532316?hl=en>.
