

# Chromebook Monitoring and Management | Getech

**The Senso platform has been created using more than 20 years EdTech experience to provide endless scale, trust and reliability in our solution. Rapid, real-time remote monitoring of devices, deep management and control for consistent network management, insightful and proactive safeguarding of users, as well as engaging and interactive tools to enhance learning through technology, senso is the only truly cloud based solution of it's time.**

Senso removes the pain and boundaries of traditional on-premises solutions, allowing you to fully monitor and manage one or many remote sites. With no server or console user software to install, a web-based portal, seamless integrations with 3rd party tools and a friendly user interface, senso gives you unprecedented control over your devices and users with minimal installation and configuration time.

**Chromebooks are a simple, secure, and shareable device that teachers and students can use to create, collaborate and make learning more engaging. They are the fastest growing choice of device for education within the UK – but how do you ensure they are being used appropriately?**

Senso.cloud's Chrome Monitoring solutions have been developed in response to a demand from teachers and administrators to support the embrace of distance learning, ensuring students using these devices are kept safe, engaged and focused, wherever they are connecting from.

## **SUPPORT**

### **Chrome Essentials**

Live view student devices, control and interact remotely from anywhere.

## **ENGAGE**

### **Chrome Class**

Focus and engage students on school - owned devices wherever they are learning from.

## **PROTECT**

### **Chrome Safeguard**

Proactive monitoring of students and staff to ensure they are protected and using school owned devices appropriately.

## **MONITOR**

### **Chrome Filtering**

Provide students with a safe learning experience with a cloud based internet filter that sticks with the device wherever a student is working from.

## CHROME ESSENTIALS

The Chrome Monitoring Essential Bundle, available exclusively via Getech, has been designed to give educators the essential tools they need to keep students on task and improve the learning experience with Chromebooks in their lessons, whether in school or via distance learning.

This solution provides teachers and administrators with an overview of the chrome devices in their class, school or trust, with live thumbnails and visibility of student activity, and the lock screen function tools to ensure focus in the classroom. (Also available on Windows devices)

### FEATURES:

- ✓ **Google Classroom Sync**  
Senso.cloud syncs with Google Classroom so that pre-built classes and users will appear in the portal, making it easy for teachers to quickly monitor students and keep them on track.
- ✓ **Close Active Tab**  
Closes the currently active tab in Chrome.
- ✓ **Launch Websites and Extensions**  
Remotely launch websites and Chrome extensions.
- ✓ **Live Thumbnail View**  
Live view of the active screens of the students in your class.
- ✓ **Lock Screen**  
This module will allow you to lock a remote machine so it cannot be used.
- ✓ **Send Message**  
Send a message to one or many remote users.

## CHROME CLASS

Cloud-based solution providing teachers with the tools to ensure learning remains at the core of the lesson, technology is enhancing the learning experience and distractions are kept to a minimum (also available on Windows Devices)

### FEATURES:

- ✓ **Ad hoc / Pin Groups**  
Portal users can now create PIN groups. These allow for clients, such as those from a 1:1 program, to be more easily grouped on an ad-hoc basis by entering a PIN.
- ✓ **Block Sound**  
Mute the volume of the remote machine (this will only mute the sound of the open tabs on a Chromebook not the whole device).
- ✓ **Send File**  
Send a file or document to any number of remote users. Files are stored in and downloaded from the cloud.
- ✓ **Block USB**  
Disable removable media.
- ✓ **Block Internet**  
This module allows the internet to be disabled on the selected device(s).
- ✓ **Ban Resources**  
Quickly and easily block access to resources such as websites.
- ✓ **Broadcast Screen**  
Broadcast a student or teachers screen to the rest of the group.

## CHROME SAFEGUARD

**Our next generation cloud-based safeguarding module aids schools in fulfilling their legal duty of care around online safety and safeguarding.**

Backed by Microsoft's read-access redundant storage service, your safeguarding logs are replicated to ensure maximum durability and high availability across their ultra-secure data-centres.

### FEATURES:

#### ✓ **Keyword Monitoring**

Keyword libraries developed with leading child protection charities such as the Internet Watch Foundation, are provided with Senso safeguard cloud. Senso will monitor student activity and create a screenshot violation, should a word or phrase matching those from the libraries is detected, and email alerts are sent to members of staff for critical or urgent violations.

#### ✓ **Dashboard**

With a top-level overview of all violations across a single or multiple site setup, Senso can deliver unparalleled insight into the users' actions and behaviour. One click drill down improves speed and effectiveness to get to the core of the problem as quickly as possible.

#### ✓ **Ban Resources**

Quickly and easily block access to resources such as websites or website content. Built in functionality to set schedules on bans to turn on or off during specific class times.

#### ✓ **Violation Logs and Screenshots**

Review keyword violations across single or multi site setups. Keyword violations that include screenshots and context date. Data surrounding the violation to help give context and improves the speed and effectiveness to get to the core of the problem as quickly as possible. Sort and search functions allow for instant filters to focus on an individual, phrase, device or date.

#### ✓ **Lock Screen**

The lock screen feature can be used as a broadcast system to alert users on many or all devices with a custom message such as "Fire - Please Evacuate".

#### ✓ **AI Visual Threat Analysis**

Uses advanced A.I. to Analyse violation images to detect the presence of material from the following categories: Alcohol, Child Sexual Abuse, Drugs, Extremism, Gambling, Gore, Pornography, Swimwear/Underwear, Weapons.

## CHROME FILTERING

**A cloud-based, category based web content filter that appropriately filters and blocks students from harmful or inappropriate content.**

### FEATURES:

#### ✓ **Block Inappropriate Content**

Senso's cloud based, category web content filter provides you with peace of mind that when students are using school owned Chromebook's to learn and work away from school, they are appropriately filtered and blocked from harmful or inappropriate content.

#### ✓ **Artificial Intelligence**

Senso's filter cloud not only benefits from extensive category-based libraries to block inappropriate websites, but also uses Artificial Intelligence to check the content of every website a student attempts to visit and will proactively include any inappropriate websites within the filtering libraries.
