

# An easier way to migrate to cloud with Chrome POC Kits from Getech

Today's businesses require flexibility and control: a concept that is easier to achieve than it sounds.

Integrating devices into your endpoint strategy that are made specifically for the cloud and mobile workforces enables you to provide a flexible environment for employees that still lets IT have security and control.

## Advantages of cloud working

### Business benefits

Secure by design

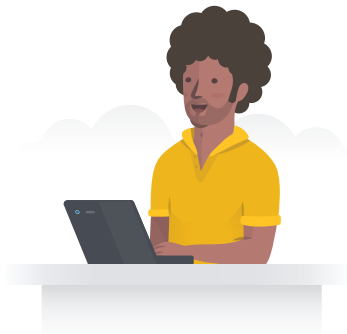

Granular control

Smart investment

### Employee benefits

Enterprise applications

Premium hardware

Workplace efficiency

Getech, in partnership with Google, has developed an exclusive Proof of Concept (POC) Kit for enterprise customers. The POC Kit allows you to test five Chrome Devices and Chrome Enterprise Management features for 30 days for only £250. This includes Getech technical consulting and White Glove service to ensure a smooth experience. Getech can also assist by providing a 30 day demo of G Suite so that you can evaluate Gmail, Docs, Drive and Calendar for your business.

Getech are one of Google's fastest growing UK Premier Partners. Our solutions support organisations in adopting and implementing Chrome and Chromebook technologies where the demand for secure and cost effective cloud connected devices become increasingly important to satisfy areas of compliance, cost and collaboration for a flexible workforce.
